Oracle says nurturing Indian startups to take them global

New Delhi, May 6 (IANS) As India gets its 100th unicorn, Cloud major Oracle on Friday said it is not only nurturing the next breed of startups to expand their footprint but also connecting them with many venture capitalists so that they get the required funding not only in India but globally as well.

Kapil Makhija, Vice President-Technology Cloud, Oracle India, told IANS that the company is already giving startups the much-needed exposure in 170-odd countries where it operates in.

"If you're going to invest in these startups, they are going to grow and become \$1-billion unicorns soon. In the process, our Cloud con-

sumption also grows so it is a win-win situation for both. We are not only giving startups access to our customers but also jointly working with them," Makhija told IANS. The company has onboarded thousands of startups in the country, nurturing them from early stages on their journey to the Cloud. The 'Oracle for Startups' programme was first piloted in Bengaluru before it was scaled globally.

According to him, India has all the ingredients to become a \$1 trillion digital economy by 2025, and Oracle is investing big in the country to help it achieve the goal fast. "Oracle is doing its part to help India maintain and sustain its digital growth.

WhatsApp rolls out emoji reactions for its users

San Francisco, May 6 (IANS) Meta-owned WhatsApp is now rolling out the ability to react to messages to people that use the most recent versions of WhatsApp for Android, iOS, Web and Desktop.

According to WABetaInfo, the current version of message reactions brings six emojis -- Like, Love, Laugh, Surprised, Sad, and Thanks. Reactions are available for chats and groups and, when users tap and hold a message bubble, they can react to a message by choosing one emoji.

Users can see who reacted to any incoming and outgoing message by tapping the reaction icon: a reaction info section shows up that lists all people with the

emoji they used to react to the message. Every time someone reacts to a user's messages, they receive a push notification, which is enabled by default but they can also disable notifications for reactions by opening your notification settings within WhatsApp. The feature is finally rolling out to more people, but note that the feature will take up to seven days to reach everyone, the report said.
